

optomap®

Retinal Exam

At **Watertown Eye Associates** we pride ourselves on providing our patients with the best possible standard of care. **Because of this we now perform the optomap® Retinal Exam with all of our patients.** This non-invasive procedure allows your doctor to see a much broader and more detailed view of the retina than is possible with conventional methods. When reviewed, the scan becomes a permanent part of your medical file, enabling your doctor to make important comparisons should potential vision threatening conditions show themselves at a future examination. **Dr. Karen Koumjian strongly believes that the optomap® Retinal Exam is an essential part of your comprehensive eye exam and prescribes it for all patients once per year.**

As part of your pre-test work up will capture **optomap®** images for review with your Doctor during your examination today. The \$45.00 co-pay for this procedure is generally a non-covered service unless being used to actively follow disease. Any questions you have about the **optomap®** Retinal Exam can be directed to your Doctor when he reviews the images with you during your examination.
